Hardware Engineer
- Haptic Feedback Suit for Virtual Reality – created a suit using vibration motors, Raspberry Pi, and the Microsoft Kinect so users can feel interactions in a virtual environment to simulate training of high-risk procedures

RELEVANT SKILLS

Knowledge of: Java, Python, Android, Javascript, HTML, JQuery, CSS, Node.js, React.js, C, C++, SQL, Raspberry Pi

WORK EXPERIENCE

Center for Career Opportunities (CCO)   **August 2018 – Present**
Peer Consultant   **West Lafayette, IN**
- Review resumes, cover letters, and elevator pitches for Purdue students to assist in their career development
- Generate awareness for the CCO services and benefits through presentations and outreach events

Delta Mu Kappa, Professional Entrepreneurial Fraternity, Purdue University   **December 2017 – Present**
Professional Development Co-Chair   **West Lafayette, IN**
- Plan events focused on developing professional skills of 150+ students. Events focus on industry marketing (resumes/LinkedIn/headshots/recruiters), start-ups and entrepreneurial ventures

Capgemini Government Solutions (CGGS)   **June 2018 – August 2018**
Intern   **McLean, VA**
- Developed an environment for a Cloud Management System utilizing CloudBolt and CloudCheckr on AWS and Microsoft Azure
- Built a web scraper to download and analyze data.gov datasets for a future visualization platform using Express.js, Node.js, and PostgreSQL
- Communicated with Principals to develop a Project Management Review appointment scheduler through the Microsoft Outlook API
- Designed a Smart Contract Proof of Concept to decrease overhead in epidemic and natural disaster supply chains with IBM's HyperLedger

Intern   **July 2017 – August 2017**
- Created an architectural analysis and developed a Proof of Concept for a fraud detection algorithm using Python
- Utilized PostgreSQL, Express, React.js, and Node.js to build a central application platform for current and future apps built by CGGS
- Presented the aforementioned work at a Capstone presentation to company executives during a weekly pipeline meeting

Tasklight, Inc.   **April 2016 – August 2016**
Junior Software Engineer (Intern)   **San Francisco, CA**
- Assisted Lead Engineer with building software products that meet requirements set forth by Head of Product
- Built a multi-platform enterprise CRM integrated with Salesforce on the MERN stack on Amazon Web Services
- Met with customers to understand requirements and needs

IncubateX   **March 2016 – April 2017**
Lead Organizer   **Washington, DC Chapter**
- Led a team to organize IncubateDC – local hackathon and entrepreneurial incubator
- Developed sponsorship packets, budget, and identified potential venues and sponsors with a total budget of $10,000
- Provided guidance to team via weekly and monthly mentorship sessions

ACCOMPLISHMENTS

- **August 2018:** First place for best use of IBM Cloud Tools and second place overall at the Social Good Hackathon by Capgemini NYC
- **July 2016:** First place the XIX.ai hackathon sponsored by NVIDIA. Interview: https://www.youtube.com/watch?v=BO7aAowpTNs
- **September 2016:** Honorable Mention for best use of CockroachDB in HackTheNorth
